

COVID-19 Update:

To our valued customers:

We like all in the community are carefully monitoring COVID-19 updates. Our highest priority is the health and safety of our customers and employees. We have instituted best practice safeguards recommended by the CDC and will continue to do so. At this point all CVB locations remain open.

We have installed hand sanitizers within each branch for both customers and employees. We have advised employees to notify their supervisors if they feel ill. We have also notified them that if they or their immediate families become ill, they should not come into work.

We want to remind our customers that there are many opportunities to conduct your financial transactions without coming into the branch locations. All ATMs at the Branch locations can accept deposits as well as disbursing cash and both mobile and internet banking are available. You may also contact our branch locations via telephone if you need assistance.

Please know that we at CVB are a part of the community and will work diligently with all of our customers as together we will get past this event.
